English Abstract

A system, method and computer program product (100) are disclosed for collaborative forecasting utilizing a supply chain management framework. A global forecast is identified for a plurality of outlets of a supply chain and then stored in memory. The global forecast (4400) is subsequently transmitted to each of the outlets utilizing a network. Feedback relating to the global forecast is received from the outlets utilizing the network and stored in memory. The global forecast is then altered based on the feedback and the supply chain is managed utilizing the altered global forecast. Many other embodiments and aspects are disclosed and claimed.

French Abstract

L'invention concerne un systeme, un procede et un produit programme informatique (100) concus pour des previsions collaboratives au moyen d'un cadre de gestion de chaine d'approvisionnement. Une prevision globale est identifiee pour une pluralite de points de vente d'une chaine d'approvisionnement puis est stockee en memoire. La prevision globale est ensuite transmise a chacun des points de vente par le biais d'un reseau (4400). Une retroaction relative a la prevision globale est recue des points de vente au moyen du reseau puis est stockee en memoire. La prevision globale est alors modifiee en fonction de la retroaction et la chaine d'approvisionnement est geree a l'aide de la prevision globale modifiee. Plusieurs autres modes de realisation et aspects sont exposes et revendiques.

Patent Details:

Patent No	Kind	Lan	Pg	Main IPC	Filing Notes
US 20030069765	A1		290	G06F-017/60	

Abstract (Basic): US 20030069765 A1

NOVELTY - The method involves displaying a network-based interface for accessing data collected from stores that are connected in a network of supply chain. An electronic order form is then generated based on the data utilizing the interface for ordering goods from distributors. The interface includes a bulletin board displaying information received from each stores about timeliness of deliveries made by distributors.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for a system for a bulletin board feature in a supply chain management framework.

USE - Used in a supply chain management framework.

ADVANTAGE - The bulleting board feature not only displays information about the timeliness of deliveries made by the distributors, but also the quality of goods issued by them, price of each goods and details of the store from which the information is received.

DESCRIPTION OF DRAWING(S) - The drawing shows a flowchart of a process for normalizing data in a supply chain management framework.

Abstract (Basic): WO 200277917 A1

NOVELTY - Method of tracking the performance of distributors consists in registering the distributors, receiving data a using a network and relating to distribution of goods to stores by the distributors and tracking the performance of the distributors using the data. The data includes delivery dates associated with the goods, performance is displayed to the stores using a network based interface and the data is received from the stores.

DETAILED DESCRIPTION - There are INDEPENDENT CLAIMS for:

- (1) A system for tracking the performance of distributors
- (2) A computer program for tracking the performance of distributors
- (3) A method of managing a supply chain
- (4) A system for managing a supply chain
- (5) A method of tracking the sale of goods in a store
- (6) A system for tracking the sale of goods in a store
- (7) A method of forecasting the sale of goods in a store
- (8) A system for forecasting the sale of goods in a store
- (9) A method of planning promotions
- (10)
- (11) A system for planning promotions
- (12) A method for processed product supply chain reporting
- (13) A system for processed product supply chain reporting
- (14) A method of providing a network-based supply chain interface
- (15) A system for providing a network-based supply chain interface
- (16) A system for evaluating the success of a promotion
- (17) A method for providing a restaurant supply chain management interface network
- (18) A system for providing a restaurant supply chain management interface network
- (19) A system for identifying goods in a network-based supply chain management framework
- (20)
- (21) A method of tracking goods in a network-based supply chain management framework
- (22) A system for tracking shipment of goods in a network-based supply chain management framework
- (23) A method of reporting in a network-based supply chain management framework
- (24) A system for reporting in a network-based supply chain

management framework

(25) A method for cost reporting in a network-based supply chain management framework

(26) A system for cost reporting in a network-based supply chain management framework

(27) A method for promotion reporting in a network-based supply chain management framework

(28) A system for promotion reporting in a network-based supply chain management framework

(29) A method of generating supply chain statistics

(30) A method for navigating a user in a network-based supply chain management interface

(31) A system for navigating a user in a network-based supply chain management interface

(32) A method of tracking the performance of suppliers

(33) A method for inventory management using a network-based framework

(34) A system for inventory management using a network-based framework

(35) A system for forecasting the sale of goods

(36) A system for normalizing data in a supply chain management framework

(37) A method of providing network-based supply chain communication between stores, distributors, suppliers, a supply chain manager, and his office

(38) A system for providing network-based supply chain communication between stores, distributors, suppliers, a supply chain manager, and his office

(39) A system for providing feedback on forecasting relating to the sale of goods in a store utilizing a network-based supply chain management framework

(40) Many more given

USE - Method is for managing supply chains as applied to manufacturing and sales.

DESCRIPTION OF DRAWING(S) - The figure shows an electronic reporting and feedback system.

Data delivery method for call centers through telecommunication system,  
involves collecting data, gathering it and making report available  
for customers through communication network and electronic bulletin  
board

Abstract (Basic):

... Data from calls handled at multiple call centers are collected  
by multiple agent consoles. The collected data are gathered and  
consolidated to make a report. The report is made available for  
retrieval by the...

... For delivery of data collected by call centers through  
bulletin board and over a network such as internet, intranet or...

40 chemical and agricultural companies will obtain access to regulatory  
and industry information using a World Wide Web site, PowerAg, that  
provides TCP/IP network access to bulletin board services and  
databases. The site should help reduce costs, lower inventories, and  
improve information dissemination for manufacturers, distributors, and  
retailers. The \$5 million venture supports electronic data interchange  
(EDI) and electronic funds transfer...

**Title: Cooperative multi- agent information gathering**

**Abstract:** We have begun a project to build a cooperative multi- **agent information gathering** system in the initial domain of computer product queries. Top level user queries drive the creation of partially elaborated **information gathering** plans, resulting in the employment of multiple cooperative agents for the purpose of achieving goals and subgoals within those plans. The **agent** will use existing **information** resources available on the Internet such as **newsgroups**, archives, magazine databases, and corporate WWW sites. Such a system takes a distributed problem solving...

...environment. For example, agents may explicitly coordinate their actions when it is desirable or necessary. **Agents** may share **information** with one another that affects what plans they pursue, what order they execute actions, and...

... that the agents are time-aware and are free to develop and follow different **information gathering** plans that depend on the amount of time they have to produce an answer. Eventually...

Identifiers: cooperative multi- **agent information gathering** ; ...

...partially elaborated **information gathering** plans

... World Wide Web, presents a great opportunity for enhanced problem solving support that incorporates information **gathering** into the problem solving framework. The concept of an intelligent **information agent** has been explored for information accessing and filtering tasks (e.g., filtering of **newsgroup** information). To provide support for more complex tasks that involve information **gathering** along with decision making capabilities, an agent must communicate and cooperate with other agents. One...

... tasks by formulating problem solving plans and carrying out these plans through querying and exchanging **information** with other software **agents** . The bottom layer consists of **information** -specific **agents** which provide intelligent access to a heterogeneous collection of information sources. The layered architecture has...

Supply chain management framework method, involves displaying  
network-based interface with bulletin board feature conveying  
information about quality of goods and timeliness of deliveries made by  
distributors

Patent Assignee: RESTAURANT SERVICES INC (REST-N)

Inventor: MENNINGER A F

Number of Countries: 001 Number of Patents: 001

Patent Family:

Supply chain management framework method, involves displaying  
network-based interface with bulletin board feature conveying  
information about quality of goods and timeliness of deliveries made by  
distributors

Abstract (Basic):

... on the data utilizing the interface for ordering goods from  
distributors. The interface includes a bulletin board displaying  
information received from each stores about timeliness of deliveries  
made by distributors.

... An INDEPENDENT CLAIM is also included for a system for a  
bulletin board feature in a supply chain management framework...

...The drawing shows a flowchart of a process for normalizing data in a  
supply chain management framework...

Detailed Description

Detailed Description  
... of these types of files exist on the Internet.

One system for file distribution includes **Usenet** (Netnews), which allows a provider of a particular data file to post the data file to everyone that reads a particular **newsgroup**. This allows for widespread distribution of a posted data file, but all data files posted...

...of users.

The distribution system must provide users a way to quickly and reliably locate **data** they wish to **acquire**.

The **distribution** system must provide wide distribution for files that are popular, while at the same time...

... interested in outdoor

equipment. A virtual community of such hobbyists that participate in an  
email **discussion group** would be excellent targets for advertisements  
from a canoe manufacturer or from white water tour...

...arisen out of the Internet revolution. The forum for such meetings has  
typically been computer **bulletin boards**, **discussion groups**, or  
chat groups, where participants may go online to talk about anything from  
cars to...means that they are good candidates for certain advertising and  
marketing pitches. For example, a **discussion group** on breeding  
poodles would be highly receptive to promotions of special formulations  
of dog ...a pet store could receive an SCC promotion or a checkout  
receipt promoting an online **discussion group** related to breeding  
pedigree cats if the customer profile indicates that the customer likes  
or...to exchange information among

themselves by visiting one or more standard computer chat rooms or  
**discussion groups**; and

(e) educates the customer about the full range of products and services  
available

on...System, as detailed in Fig12.

27 Infomediary Window - provides the interface to the customer to  
**obtain** the products, services, and **information** from retail merchants,  
**wholesalers**, and manufacturers participating in the Infomediary  
business.

Exemplary information flows in Fig. 18 comprise one...of a shopper to  
begin the dialogue.

8 It provides an excellent forum for online **discussion groups**.  
Industry

experience has shown that online community groups can effectively provide  
primary research data.

9...easy for users to help themselves by accessing

Frequently Asked Questions (FAQs), or by asking **discussion groups** questions, in addition to getting support from the SAMIS call center.  
f. The PUMP operator...ICE could provide market feedback to the ICE stakeholders by means of daily customer email **discussion groups** in one or more newsletters that could be mined for feedback market research.

**ABSTRACT:** A proposal that would give QS-9000 registrars a helping hand with certification to the Big Three automakers' quality-system requirement is on the table. The current proposal suggests that automotive suppliers, mostly tier-one companies that supply directly to the Big Three, make their qualified auditors available to registrars free of charge.

**TEXT:** proposal that would give QS-9000 registrars a helping hand with certification to the Big Three automakers' quality-system requirement is on the table. The current proposal, although not in writing, suggests that automotive suppliers, mostly tier-one companies that supply directly to the Big Three, make their qualified auditors available to registrars free of charge. These auditors would work with a lead auditor employed by a registrar.

"Registrars are already having difficulty handling QS9000 certification for tier-one suppliers. They're doing it, but they're busy and we expect it to pick up," said Jack Tyson, manager of business improvement, for tier-one supplier United Technologies Automotive, Dearborn, MI. (For more information regarding the QS-9000 concerns, see "QS-9000: Not Firing On All Cylinders," p. 36.)

Tyson also chairs the Southfield, MI-based Automotive Industry Action Group's Sub-tier QS-9000 Deployment Work Group. He expects demand to grow as more automotive suppliers, including those that sell to other automotive suppliers, are asked to at least comply with QS-9000 standards (see "QS-9000's reach extends to sub-tier suppliers," May 1996, p. 12).

The version of the proposal that puts the burden of providing free auditing assistance on tier-one suppliers hasn't been formalized because it hasn't yet been documented. However, Dan Reid clarified the point that suppliers, not the Big Three, would probably provide most of the free auditor time. Reid, supplier quality manager, GM Powertrain Group, Pontiac, MI, and the Detroit-based General Motors Corp.'s representative on the Supplier Quality Requirements Task Force that developed QS9000, made this clarification during an International Accreditation Forum (IAF) meeting in July. "It's between the Big Three or the supplier. It's leaning heavily on the supplier side," he added.

Because the proposal is still in the idea stage, many details need to be nailed down, such as conflict-of-interest issues. "There are no major roadblocks from the accreditation body point of view, but outside auditors will have to meet basic registrar requirements," Reid said.

Other considerations are insurance, confidentiality, scheduling, and the relationship between the registrar and the industry auditors, according to Marshall Courtois, president of Quality Systems Registrar Inc., Herdon, VA. Courtois also is president of the Independent Association of Accredited Registrars (IAAR), also in Herdon. Because the IAAR has an official proposal received an official proposal made during the clarification made during

1  
Reid's IAF press time, Courtois said that the association at press time, Courtois said that to discuss the association hadn't met to discuss therefore he issue a formal statement on therefore he can't provide a formal statement on position. However, he did say that regardless of who the industry auditors are, Big Three and/or supplier employees, many details need to be worked out first.

(Chart Omitted)

Sidebar:

L Quality Online has begun a reader forum specific to QS-9000, which can be found at <http://ll.qualitymag.com>. Whenever we are able to obtain input from the Supplier Quality Requirements Task Force in answer to visitors' questions and comments. we will post it in the forum.
